

HLFNC

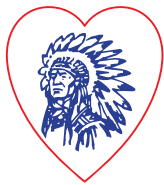

HEART LAKE FIRST NATION
CONSTRUCTION

Who we are

Heart Lake First Nation Construction (HLFNC) is wholly owned by the Heart Lake First Nation and has become a key contributor to the Nation's economic development.

The company operates as Heart Lake Contracting whom has been servicing the oil, gas and forestry industries in northeastern Alberta for a number of years. Our corporate culture focuses on **project completion** and **safety first**, which has translated into accident-free, quality work for all our customers.

HLFNC has partnered with a diverse number of established service contractors that cover the whole spectrum of asset development, from scoping and early design to full-on detail engineering, procurement, fabrication and construction. This, coupled with our proactive approach to quality control, ongoing quality assurance monitoring, training, audits and inspection, make HLFNC a formidable player in Northeastern Alberta.

**HEART LAKE
FIRST NATION**
HeartLakeFirstNation.com

Heart Lake First Nation # 469 is located about 70 kms. northeast of the Town of Lac La Biche, AB and 220 kilometers northeast of Edmonton, AB. The First Nation is on a 4,496-hectare reserve along the west and north sides of Heart Lake. The First Nation is a signatory to Treaty 6 and belongs to the Tribal Chiefs' Ventures Tribal Council.

HLFNC is certified with Energy Safety Canada's COR Program, is an ISNetwork Member Contractor and is registered with ComplyWorks.

COMPLYWORKS

The paper used in this brochure is Pacesetter Silk Cover made with 10% post consumer fiber with FSC® (Forest Stewardship Council®) certification for responsible forest management.

What we offer

Productive, healthy onsite camp housing

Conklin Lodge, onsite catering and operations, commercial laundry, turnkey fleet camp solutions

Road building, upgrading, maintenance

All civil works related to building, upgrading and maintenance of lease and oilfield roads, bridges and crossings including gravel supply

Lease and well pad construction

including SAGD leases

Pond and lagoon construction

Surveying, excavating, construction and lining of ponds and lagoons (e.g. for tailings, wastewater, etc.) including rehabilitation and reclamation

Site reclamation and ROW seeding

Reclamation and remediation of decommissioned sites and ROWs to repair and restore the natural qualities of the soil, vegetation and ecosystems that were disturbed or damaged by human activity

Labor and slashing crews

Qualified crews for purposes of construction or reforestation, utilizing the most efficient and environmentally sensitive methods

Seismic ROW services

Right-of-way clearing using cats and mulchers which limits ground crew work and reduces risk of injury. Mulching also works to eliminate expensive mobilization fees from contractors

Conventional engineering services

Multidisciplinary engineering and technical services including survey, covering the entire asset lifecycle, from scoping and early studies to front-end and detail engineering

3D scanning, modeling and CAD development

3D modeling and CAD development aided by state-of-the-art 3D laser scanners that produce 3D solid models assisting in reducing maintenance and turnaround times

Paramedic/rescue units

Unparalleled experience, expertise and reputation in emergency medical services for everything from small projects to fully equipped field medical clinics, as well as a full range of safety, fire and rescue teams and training services

Scaffolding, tarping and hoarding systems

Qualified crews for erection and dismantling of work face access scaffolds, system scaffolding, tube & clamp scaffolding, suspended scaffolding, and industrial tarping & hoarding systems. We also provide rentals and sales of quality scaffold materials

Insulation, fireproofing and cladding

Major equipment insulation, fireproofing and cladding for turbines, boilers, precipitators, valves, fittings and large vessels, including removable insulation blankets and pads

On-site machining

Equipment and skilled manpower for on-site machining for a variety of industries that require it in the field

Non-destructive testing

State-of-the-art non-destructive testing to evaluate the properties of materials, components or systems for the oil & gas, pipeline and mining industries.

Rotating equipment preservation programs

Assembly, commissioning, inspection and maintenance of rotating equipment for oil and gas, mining, power generation, pulp and paper, plastics, food and steelmaking

Site clearing/salvage

Site clearing and materials salvaging (e.g., felled timber, topsoil, post-demolition debris)

Potable water supply and delivery

Delivery of potable water for camps and temporary drilling camps

Construction equipment

Equipment rentals for civil works (excavation, earth moving) construction and materials transport (cranes, trucking)

Qualified tradesmen

Skilled and highly qualified tradesmen, specializing in facility and pipeline construction, piping and structural fabrication, as well as maintenance and turnaround work

Facility maintenance

Maintenance services for facilities including camps. May include janitorial, building maintenance, snow removal, road maintenance and other services as required

Project management personnel

Seasoned project managers with experience in project oversight, interfacing with team members and stakeholders, from early planning through to execution, with a solid grasp of a project's technical and manpower needs, change management and overall business requirements

Shutdowns

Scheduled and non-scheduled shutdown operations, including pre-shutdown planning, materials procurement, and necessary human resourcing preceding scheduled maintenance operations

Site supervisory personnel

Sourcing of supervisory personnel with experience in coaching and mentoring staff, working with them to establish suitable goals, action plans and timelines

Land transportation

Transportation and management services to companies active in cartage, truckload, logistics, warehousing and oilfield transportation space with operational reach throughout North America.
